

I am writting to persuade you against the Low power FM changes being considered. These changes could endager the existence of radio K-love perhaps in my community and other communitites. K-LOVE is the only station in my area that provides christian music. It is the only radio station sources that provides the music I listen to. If K-LOVE were to be displaced it would leave this community with out a family oriented radio station. There aren't many stations clean from coarse jokes or language this is the only safe station there is in this community. You would be taking away a service from thousands of listeners. K-Love also provides positive service for those who need it like contancting pastors they have on staff to talk to those in need. Providing news and event within the christian community that reach out to the whole community for a positive change in peoples lives. This is an important station for communitites around the U.S. Please help us keep a source of positive influence. Thank you
Frank Sevilla
